## Professional Summary

Senior Front-End Developer specializing strictly in HTML, CSS, and JavaScript. Expert in building fast, responsive, and accessible user interfaces without reliance on heavy frameworks. Strong focus on performance optimization, clean architecture, and maintainable code using modern JavaScript and scalable CSS techniques.

## Skills

HTML5 (Semantic Markup, Accessibility)

CSS3 (Flexbox, Grid, Animations, BEM Methodology)

JavaScript (ES6+, DOM Manipulation, Event Handling)

Responsive & Web-First Design

Cross-Browser Compatibility

Performance Optimization (Lazy Loading, Minification, Critical CSS)

Version Control (Git)

## Projects

### Selected Projects

#### Interactive Dashboard

- Built a dynamic dashboard using JavaScript with modular architecture.
- Handled real-time UI updates using efficient DOM manipulation.
- Designed responsive layouts using CSS Grid and Flexbox.

#### E-commerce Front-End

- Developed product filtering, search, and cart UI using pure JavaScript.
- Optimized rendering performance by minimizing reflows and repaints.
- Implemented responsive design for desktop and mobile.

#### Portfolio Website

- Designed and developed a fully responsive personal website using HTML, CSS, and JavaScript.

- Applied accessibility best practices and semantic HTML.
- Optimized load time using asset compression and efficient CSS structure.

## Experience

### Front-End Development Experience

- Built and maintained web interfaces using HTML, CSS, and JavaScript only.
- Translated UI/UX designs into clean, pixel-perfect implementations.
- Improved performance by reducing DOM complexity and optimizing assets.
- Ensured compatibility across modern browsers and devices.
- Debugged and fixed UI issues using browser developer tools.

## Education

Architecture 2014

Front-End courses since 2012
